President's Message

Hello RTB Members!

Another quarter of the year has come and gone along with the change of seasons (well, almost...). RTB AALAS has been busy this summer networking with colleagues, planning upcoming events, and having some fun doing it!

This summer, we hosted two awesome events for members. In August, we held a Suture Dry Lab at NCSU-CVM for members to learn about differences in suturing techniques, when to use them, and a chance to practice what they learned from our well-versed and experienced presenters and training assistants. The event was a great success and I want to say thank you to all that attended, assisted, and made this event possible.

Also in August, RTB brought back a member favorite with a tour of the Duke Lemur Center. We had a great group of attendees, learned a lot about the adorable DLC residents, and how the important research they are involved in is impacting the world. Be sure to check out all the photos later in this newsletter!

As we head into the cooler weather (hopefully), we look forward to our 19th Annual Golf & 6th Annual Cornhole Tournament on October 4th. Get ready to have a blast as we return to Mill Creek Golf Club.

Enjoy the last few weeks of summer and, as always, THANK YOU for being a member of RTB AALAS and for supporting this organization. We couldn't do it without each of you!

Sincerely,
Amanda Pacio
2023 RTB-AALAS President

2023 Executive Council

RTB Officers

President - Amanda Pacio

President-Elect – <u>Lisa Webb</u>

Past President - Ashley Foley

Treasurer - <u>Lena Perdue</u>

Secretary & Communications – Andrea Murr

RTB Committee Contacts

Programs – <u>Courtney P. Nesline</u>

Vendor Liaison – Nancy McCormick

Newsletter - Spencer Bridges

Local Arrangements – <u>Emily Weston</u>

Nominations & Awards - Morgan Holmes

Membership & Webmaster – Nora Dragon

RTB AALAS 2023 Events

August 1st – Suture Dry Lab at NC State CVM

August 24th – Duke Lemur Center

October 4th – Annual Golf & Cornhole Tournament

October 11th – Museum of Natural Sciences in Raleigh

November 17th – Carolina Tiger Rescue Work Day

December 14th – Board Recruitment Social Event

MARK YOUR CHLENDAR!

19th Ammual RTB AALAS Golf Tournament

6th Annual Cornhole Tournament

WEDNESDAY, OCTOBER 4, 2023 at MILL CREEK GOLF CLUB

RTB AALAS

Museum Tour and Social

Wednesday, October 11th, 2023 NC Museum of Natural Sciences 11 W Jones St, Raleigh, NC 27601

Behind the scenes Museum Tour: 2:00pm - 5:00pm

Registered attendees must meet at the front desk by 1:45pm

Join us for a behind the scenes tour of the Museum's animal program. Attendees will meet with the head of the live animal teaching collection, learn about the health management aspects of the Museum, and tour the animal facility.

Admission to the Museum is free!!!

Tour registration is limited to the first 45 people who sign up through the link below. There will be time available after the tour to explore the museum. For those who are not able to take the tour, you may explore the museum while the tour is in progress.

Attending members are eligible to win \$20 gift cards

Register: https://rtbaalas.wildapricot.org/event-5419540

For more information about the Museum, visit http://naturalsciences.org/

RTB AALAS Carolina Tiger Rescue Tour and Work Day - November 17, 2023

Click <u>Here</u> to register! Space is limited.

Please arrive by 12:30pm to sign in.

The tour begins at 12:45pm with work assignments to follow.

Attending members are eligible to win \$20 gift cards

Please bring items to donate and wear appropriate attire.

See the links below for a list of items that are needed and additional information regarding this event.

Duke Lemur Center Tour

3rd Quarter

3rd Quarter

How many of you are on social media?

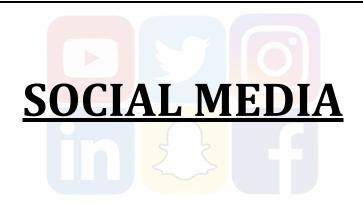

There are several organizations that are on Facebook as well! Some organizations you might want to follow are listed below.

Homes for Animal Heroes

Homes for Animal Heroes (HAH) is a national program dedicated to rehoming retired research animals, mainly dogs, and sharing the facts about the critical role animals in research play in curing disease. HAH is building a network of dog experts that can effectively work with research institutions to rehome retired research dogs in every state across the country, one location at a time. Our goal is to permanently rehome these animal heroes into loving homes through a comprehensive foster-based program. https://www.facebook.com/homesforanimalheroes/

Understanding Animal Research

This page regularly shares a weekly roundup of animal-based research results called "This week in animal research." The features have pictures and a link to the Understanding Animal Research page. The page then links to each of the six studies featured. It's easy to share these to your own feed to help your FB friends know what discoveries animal research has led to. http://www.facebook.com/UnderstandingAnimalResearch

The Foundation for Biomedical Research

This is the Facebook page for the well-known advocacy group. They regularly share items related to animal research that can help keep you in the know about what's happening in biomedical research.

http://www.facebook.com/FBResearch

AALAS

Our parent organization is on Facebook! Their page feed has news about deadlines and changes going on at AALAS and occasional features on services and products AALAS offers.

http://www.facebook.com/pages/AALAS/221279445386

The AALAS Foundation

The AALAS Foundation is very active on Facebook. They host part of the Share That You Care campaign on Facebook and regularly post ideas for public outreach and awareness in biomedical research.

http://www.facebook.com/aalasfoundation

GetReal! is a podcast with Dr. Cindy Buckmaster that lays out the facts about biomedical research with animals, so you have the power to make informed decisions about the future health of your loved ones - both people and animals. https://www.getreal.naiaonline.org/

Be In the Know!!

Want to know more? Check out some of the latest blog stories from one of our vendors

5 Simple Ways to
Supercharge Your
Laboratory Animal
Program

Are you searching for ways to revamp your laboratory animal program? Based on our Webinar with Jeetendra R. Eswaraka, BVS, PhD, DACLAM, here are his solutions.

How to Overcome Difficult
Personalities in Lab Animal
Science

Based on our webinar, laboratory experts Laura A. Conour, DVM, DACLAM, and Pamela Straeter, MS, RLATG, CMAR, CPIA, discuss how to overcome difficult personalities in lab animal science.

Feel free to check out all of our blog stories at the following link: https://blog.allentowninc.com/.

Animal Research Education and Awareness (AREA) Program

Since 1995, the AALAS volunteers have conducted the Animal Research Education and Awareness Program in conjunction with the AALAS National Meeting.

This enlightening and entertaining program has introduced thousands of high school science students and teachers to laboratory animal science and the vast array of career opportunities in biomedical research.

Fueled by the passionate financial support of Pfizer, the AREA program is a prime example of how AALAS and the AALAS Foundation are striving to educate the next generation of leaders about the essential role of animals in research, education, and product safety testing.

Based on the success of the AREA Program at the AALAS National Meeting, many AALAS branches throughout the country have hosted similar programs at branch and district meetings.

This guide is designed to provide AALAS branches with the information and resources needed to conduct a successful AREA Program. Sign up to serve as a Tour Guide or be an Exhibitor stop in our scavenger hunt at the 2023 National Meeting AREA Program in Salt Lake City, Utah. (Must be a registered attendee of the 2023 AALAS National Meeting to participate.)

The Importance of Public Outreach

The health of laboratory animal science tomorrow depends on improved science preparation of our students today.

Nothing is more essential to the health of biomedical research than human resources — the people we are counting on to produce the next generation of knowledge and products in laboratory animal science.

We must, as an industry, continuously promote the benefits of biomedical research to preserve public support for animal research and maintain a steady flow of talent into the nation's science workforce.

The AREA program not only provides students with authentic information about the care and use of animals in research, but also gives students the opportunity to interact with dozens of passionate laboratory animal science professionals.

This interaction drives home the fact that AALAS members are compassionate professionals who are dedicated to providing the best possible care to the animals that are enabling us to advance human and animal health.

Participating in the AREA program is a great way to advance students' understanding, respect, and support for the critical role of laboratory animal science and the people who work in this field, and it's a fun way to make an impact on the lives of young people interested in science and medicine.

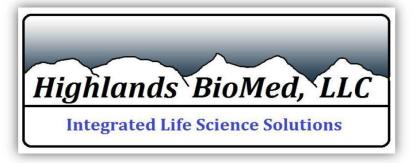

<u>The AREA Program Guide</u>- contains complete instructions on how to conduct this tried-and-true program. The guide includes everything you need – from student invitations to links to PowerPoint presentations – to make this an easy and rewarding experience for your branch members and AREA Program participants. You may also find the slides to the <u>"2016 National Meeting Branch AREA Program Training Workshop"</u> helpful. In addition to the step-by-step guide, AALAS also offers—if available—free AREA Program backpacks, notebooks, pens, and Foundation outreach materials.

Want to get more involved with RTB AALAS but don't know where to start? Are you ready to use your talents, and have fun at the same time? The RTB Executive Committee is looking for help from our branch members to keep everyone active and to continue our mission! Please click here to fill out an interest form and a committee member will reach out to you as soon as possible!

VOLUNTEERING IS A GREAT WAY TO GIVE BACK TO THE LOCAL AALAS BRANCH. PEOPLE JUST LIKE YOU GIVE THEIR TIME, ENERGY, AND EXPERTISE TO HELP SHAPE, ADVANCE, AND PROMOTE THE FIELD TODAY AND FOR FUTURE GENERATIONS. INTERESTED IN VOLUNTEER OPPORTUNITIES? CONTACT US

PMI® LABDIET® LABORATORY ANIMAL CARE COURSE

\$50 FOR ALL 6 COURSES

Recieve your Laboratory Animal Care Course certification in a convenient online format! This internationally recognized course is designed for everyone working with small animals—from new employees to those advancing to the ALAT.

Visit HTTP://WWW.PMI-LACC.COM to efficiently learn the core principles of laboratory animal care!

- Includes 6 lessons
- · Work at your own pace
- Grades reported immediately
- Certificate issued upon successful completion of the course
- Earn 37 CEU's
- Total cost of enrollment is \$50

ONLINE AND PRINT VERSION AVAILABLE

TO ENROLL:
Visit www.pmi-lacc.com today!

FOR MORE INFORMATION: Contact Tricia Lutman- 636.742.6295

LabDiet.
Your work is worth it.

Gojahead. Walk all over us.

Feet and wheels bring a LOT of contamination into your facilities. Washing floors or spraying feet and wheels is time consuming and messy. Shoe covers are a pain and expensive.

Peel off mats are expensive and ineffective.

TechTrak Contamination Control Floor Mats capture foot and wheel borne particulate BEFORE it can be brought into your vivarium.

Just walk over it, and the contamination will remain held in place until cleaned off.

Oh, and since it's from Ancare, you know you can count on us to back it up.
